Strategies and Solutions

For more than 20 years now the main sphere of my work has been developing possibilities of IT organizations.

I have a working experience in all the IT areas. As an Information Technologies Manager I have been designing IT representing the interests of the user organization.

My aim is to support an enterprise in an effective, valuable IT.

In 2001 I have founded the company GET Information Technology GmbH.

A handwritten signature in white ink that reads "Manfred Esser". The signature is written in a cursive, flowing style.

Prof. Dr. Manfred Esser
General Director
GET Information Technology GmbH

Our mission:

Value business potentials with Information Technologies.

Thank you for your interest in the GET Information Technology GmbH. In this brochure we would like to tell you about our company and the services we offer.

Our company is rendering consulting services in the Information Technologies sphere. Our task is creating the innovative and efficient IT usage solutions for increasing the business efficiency of the enterprises – our customers.

The result of the IT introduction is attracting new customers, increasing the business efficiency of the enterprise, strengthening its market positions and achieving strategy advantages.

We will help you to use the vast potential provided by the information technologies nowadays in the best way possible. We will be with you since the moment of generating an idea to the project's complete realization.

Our company's Know-How and working experience, notable for their individual approach and novelty, are concentrated on the three spheres of competence:

- IT-Alignment and Controlling
- IT Services Automation
- Software Solutions & Support

Offering the solutions, we take our customer's side. We solve complex questions by means of different specialists enlisted in the accordance with the task set. Every member of our team is an expert in a certain field, introducing his own experience, special knowledge and a personal view on the problem.

Rendering the services we aim at the project's successful realization and the capital productivity, striving to increase the efficiency and profitability of our services.

We build the cooperation with our customers on the basis of confidential and partner relationships. We work objectively and independently, which gives us an opportunity to offer our customers only what they really need.

Our tasks:

The efficient use of the IT and the optimization of services w

As a rule, organizations think in large categorical concepts, but still begin with little tasks. Very rarely the enterprises start running mega-projects straight away. On the opposite, long-term projects are usually divided into shorter ones in the frame of the common strategy, in the hope by the means of planning to avoid the system errors and the losses connected with them.

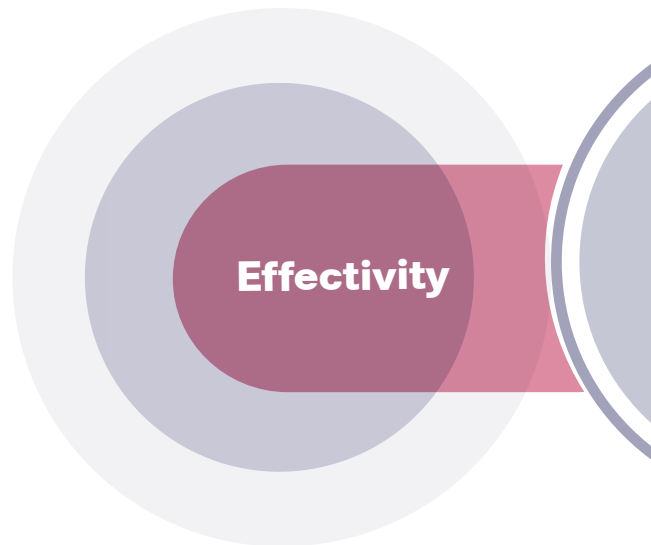

IT Alignment & Controlling

For the IT strategy extended influence to your business development, it should become an integral part of the whole business strategy of the enterprise. We will help you to design an efficient IT strategy, to take appropriate IT decisions and to control your business activities in the IT field.

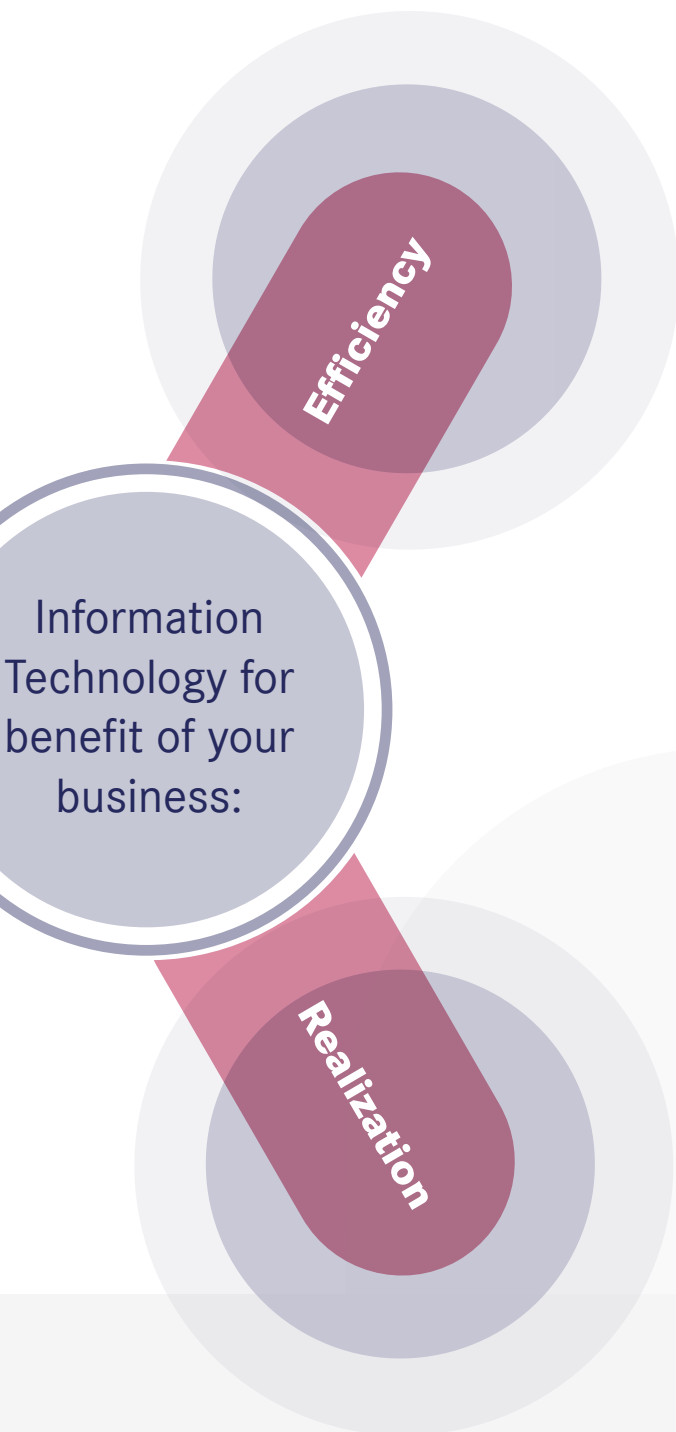

The last few years have brought some substantial changes into the IT business. An incredible technology boom has been followed by the tough cost cutting. At the present time while arranging a deal, besides having a real understanding of the expenses, on the first place one should put the efficient use of the IT to the benefit of business.

From the ideas – to the concerted conception. According to this motto we will create the solutions meeting your personal requirements, based on our solution frames:

- IT strategy development
- IT architecture creating
- Program and resource management
- CIO office organization
- IT-Controlling
- IT Sourcing

with the least costs

Professional Services Automation

Creativity and the simplicity in use lay in the basis of the efficient service processes. We will help you to win the customers satisfied with the proficiency of your services.

The service rendering organizations today face the necessity of providing more and more complex services, and at the same time they suffer a constant budget cutting. This problem could be solved by the professional service management. This process's task is rendering services of invariably high quality according to the current market prices. It is the "technology push" in the IT sphere itself that makes it possible to create the new services.

For the optimizing the IT service processes we are using de-facto-standard ITIL. Our solution frames are based on the interaction of e-procurement, asset-, service- and system-management. We will develop innovative solutions for you in the following spheres:

- Design of professional services
- Creating the Service Relationship Management
- Creating the Performance Reporting
- Value Based Cost Cutting in the IT

Software Solutions & Support

At the present time innovative software systems are the major requisite for the competitive business running. We will help you in planning and realization of software solutions suitable for you.

There could hardly be found one more area with such a big number of failed projects as the software engineering. For that not to happen with you, we can provide you with all the necessary warranties owing to our competence and thorough project managing. Using our offshore services you can substantially cut your costs and overcome possible weak points.

Our knowledge in the hi-tech sphere, optimized development processes and high quality standards enable us to create solutions meeting all your requirements – simple in use, up-to-date and efficient. We can offer you the following:

- SAP Application Services
- Offshore projects realization and support
- Complete development of software products
- Development of individual software solutions
- ERP systems integration

GET Information Technology GmbH

Certain things should be experienced
before being understood.

Stefan Zweig

Our employees have a large working experience in other companies. We count on motivated and highly qualified specialists who themselves can guarantee the best quality of the service rendering and attentiveness to the customers. We are constantly updating our special knowledge and methods of its practical realization, as we consider this to be the most important thing in professional rendering services to our customers. We will be satisfied only when one can measure the real results of introducing IT in your organization.

Via the intensive collaboration with the famous universities we are constantly increasing our competence. We invest in practice oriented research projects, in scientific studies and analyses in the corresponding fields, so that to be always informed about the actual trends and success factors. The results of our research and practical work have been published, so you can get acquainted with them.

Our staff is more than 70 people working in the three branches of our company in Grevenbroich (Dusseldorf), Walldorf and St.Petersburg. Our customers are famous enterprises in all the fields. The increasing turnover and a steady growing number of employees are the evidence of the company's constant development and success.

We are interested in our work, have a desire and potentials to advance and promote the business and will be always glad to have an interesting and effective collaboration with you.

We will be happy to answer all your questions and provide you with any additional information. Please, contact us by the following addresses and telephones. We will be always glad to hear from you.
